67 "See and Treat" Clinics Worldwide
59,845 Documented Women Screened/Treated

GIVE TO SAVE ETHIOPIA

Ethiopia

Overview

Cervical cancer is an epidemic in developing countries where medical training and other resources are scarce, if not completely inaccessible. Each and every year upwards of 500,000 new cases of cervical cancer are discovered globally. A shocking 85% of these new cases occur in resource-poor countries such as Ethiopia. Sadly, 300,000 women are lost to this preventable disease annually. No woman deserves to die an undignified and painful death, and no child should lose their mother to this disease. Country-wide implementation of screening and treatment programs is critical.

Cervical cancer ranks as the second greatest cause of both female cancer and female cancer deaths in Ethiopia. Our reported VIA positivity rates range upwards of 19%, as compared to World Health Organization's estimate of 12%. This data demonstrates that "See and Treat" centers are an absolute necessity.

Female Population at Risk / Age 15+	29,430,000
New Cases Detected Annually	7,095
Annual Mortality	4,732

The CCC Impact

CureCervicalCancer's work in Ethiopia began April 2013 and was CCC's first mission destination. Our team has visited this country for training, clinic establishment, evaluation, and resupply programs every year since. Over the last three years, CCC has trained and certified dozens of local healthcare providers in the "See and Treat" procedure, and has screened nearly 4,000 women at 13 sustainable clinics in remote areas in the country.

	CCC "See and Treat" Clinics Established:	Trainees Certified
April 2013	2	17
November 2013	1	5
April 2015	4	26
Totals	7	48
Documented women screened by CureCervicalCancer		4,181
Positivity Rate		18%
Documented women treated by CureCervicalCancer		656

Program Challenges & Opportunities

- We continue to explore and research new and revised reporting models.
- Coordination with ground partners on revised strategy and service delivery is required.

Priorities for 2016-2017

- Revisit Ethiopia to evaluate the status of our clinics, the competence of the certified providers, and the functionality of the equipment (resupplying if necessary).

Partners

- Ethiopia Ministry of Health
- St. Paul's Hospital, Millennium Medical College (SPHMMC)

Major and Minor Clinic Contributors in Ethiopia (\$10,000 PLUS)

- Judy Carmel - Morris A. Hazan Family Foundation
- Jack and Deborah Oxley - Mary K. Oxley Foundation
- Gillian and John Wagner - The Ahmanson Foundation
- Tad O'Connor - Victoria M. O'Connor Charitable Fund for Academic Excellence
- Kerry and Norah Clark - Norah and Kerry Clark Foundation
- Susan and Bill Dake - Susan and Bill Dake Foundation
