## ❄️ Holiday Giving ❄️

Please Help Us.

*Dear friends and supporters of  
CureCervicalCancer,*

We are so grateful.

In March 2013, our first sustainable "See and Treat" clinic opened its doors in Mekelle, Ethiopia. We could not have imagined where we would be in only a year and a half.

Today CureCervicalCancer has 25 ongoing clinics in 5 countries spanning 3 continents. By the end of 2014 we hope this number will be 27 clinics. We have screened over 12,000 women for cervical cancer and treated nearly 2,000 women for pre-cancerous lesions.

These are women who had NO access to this kind of service. These are mothers, daughters, and sisters who will be alive to keep their families and communities together instead of dying a painful and untimely death from a preventable disease.

Today we have trained nearly 200 local healthcare professionals around the globe in the "See and Treat" cervical cancer prevention method. These professionals have a new knowledge base and skill-set they can take into their future career endeavors. They come out of our training with a full understanding of the scope of this epidemic, and are inspired and empowered to use their newly acquired skills to combat cervical cancer. They become community leaders and activists for women's health.

None of this would exist if it weren't for you. It has been your generosity and support that has made this possible and will allow us to continue bringing this life-saving program to women across the developing world.

We are writing to express our deepest gratitude for your support and also to ask you to consider CureCervicalCancer in your holiday giving this season.

As always, we welcome and encourage your continued support! Please donate at [www.curecervicalcancer.org/donate](http://www.curecervicalcancer.org/donate).
