CCC's "Angel" and Board Member visits her clinic in Quang Ninh, Vietnam
(December 2014).

Highlights from 2014.

2014 was an amazing year for CureCervicalCancer. With the help of supporters like you, we...

- **Established 18 sustainable, ongoing cervical cancer screening and treatment clinics** and expanded our international programs in Kenya, Haiti, and Vietnam. With a total of 27 clinics, CCC's presence in the developing world is becoming stronger by the second! Today, nearly 17,000 women have been screened/treated in a CCC "See and Treat" clinic.
- **Empowered hundreds of healthcare professionals around the globe** by training them in the "See and Treat" cervical cancer prevention method. Meet a few of our trainees and read their stories by visiting [our website](#).
- **Raised nearly \$400,000** in individual donations and competitive grants.

None of this would have been possible without you!

Additionally, CCC has two upcoming medical missions. In April, CCC will venture to Addis Ababa, Ethiopia to establish 4 more clinics at Saint Paul's Hospital Millennium Medical College, an institution established to challenge the current status quo in Ethiopian healthcare. In May, CCC will return to Guatemala, where we have been invited by Asociación Compañero para Cirugía (Partner for Surgery) to implement 2 new "See and Treat" programs.

With our deepest gratitude,

Patricia Gordon MD - Founding Director/Board Chair

Jennifer Lang MD - Medical Director/Vice-Chair
